

# Timber Frame Pavilion

---

These beautiful structures give you maximum opportunity to enjoy your outdoor space in style.

Each pavilion comes standard with

- 4"x6" pressure treated skids
- 2"x8" treated deck boards
- 8"x8" rough sawn pine posts
- 6"x8" beams
- 4"x6" rough-cut rafters
- 4"x8" ridge beam
- 2"x6" tongue and groove ceiling surface
- All wood surfaces come with 2 coats of high-quality exterior stain and one coat of clear
- The roof includes bubble wrap insulation and a vapor barrier
- Metal roof
- You chose the color of the stain and roof. We build it, finish it and ship it to you. We can also deliver in kit form so the do-it-your-selfer can build it.

These structures require a 6"-8" gravel base or better.

We can accommodate virtually any size requests. If shipping a fully constructed pavilion, maximum size is 16'x48'.

Available options include: log or rough sawn railings, screening with a door, enclosing one or multiple sides, with or without decking as a kit or built on site.

Customizing is also available - just ask!
