

# The Fireside Series Cabin

---

Our Fireside Series is a perfect blend Between our Trapper Cabin Series and the Northwoods Cabin Series. This ranch style cabin features a double crows nest dormer, creating a great space for the kids to hang out, adding storage space, and extra bunk space. With an open, customizable floor plan you can create your dream living environment. This series is available as a one or two-bedroom cabin, with an optional full bathroom and kitchenette. These cabins are available from 10' to 16' widths, and up to 48' long. Our cabins are built to last starting with the 4x6 treated floor joists, then a layer of exterior grade

---

---

$\frac{3}{4}$ " plywood, 1" rigid foam, another layer of  $\frac{3}{4}$ " interior grade plywood, then finally your tongue and groove flooring. Our walls are 100% solid Eastern White Pine Logs which we sourced locally, then send through our milling and drying process. We then set our 3x5 timber rafters and 4x8 ridge beam, top that with 1x8 tongue and groove pine to add that beautiful wood cathedral ceiling. Now we add 1  $\frac{1}{2}$ " rigid foam insulation in between 2x4 roof purlins, then another layer of insulation in the way of a bubble wrap underlayment which also creates a waterproof vapor barrier, and then we top it with a 50 yr. Metal roof. On the inside, you can choose log rails and trim, or rustic timber, you can also choose your finish stain colors. We then build your cabin in our manufacturing facility and ship it out to your prepared location. We set the cabin on your foundation, check operation, then you or your local contractor can make any necessary utility hook-ups. Your new Cabin will come with a Cabin Owners Manual to ensure a proper set-up, how to care for your cabin, and even a maintenance checklist to ensure you can enjoy your cabin for many years to come.

Starting at \$24,528.00 for a 14'x 24'
