

Timber Frame Pavilions

Our Timber Frame Pavilions give you maximum opportunity to enjoy your outdoor space with style! These solid structures add beauty and grandeur to patios and backyards.

General Pavilion Information:

- 8"x8" rough sawn pine posts are sturdy and solid
- 6"x8" beams offer impressive stability
- 4"x6" rough-cut rafters add rustic character to the ceiling
- 2"x8" tongue and groove ceiling compliments the other wood elements
- Metal roof system
- All wood is unstained
- We have two building options available: Build on Site or Kit
 - We will gladly build on site for our customers who live within a reasonable distance from Newbury, OH. Most pavilions are completed in one day.
 - Our kits can be shipped to your destination. You are responsible for unloading, and you can build the pavilion when you are ready. And yes, you will need to have construction experience to do this yourself.

Additional Information:

- **Sizes** – We have several sizes of pavilions available.
- **Foundation** – These structures need to be mounted on a concrete pad or footer.
- **Zoning** – It is the owner's responsibility to determine the zoning requirements of their location and to secure any required permits.
- **Maintenance** – You'll want to stain and seal the wood to match your environment. Resealing should occur every 3-5 years, based on exposure to the elements, etc.

Pavilions!
